MATHEMATICAL GAZETTE

No. 315, FEBRUARY 1952—No. 318, DECEMBER 1952.

1. Articles.
2. Mathematical Notes.
3. Reviews and Notices.
4. News of Branches.
5. Gleanings Far and Near.
6. Correspondence.
7. Miscellaneous.
8. Plates.

ARTICLES.

Author.	Title.	Page.
F. Bowman.	Cyclic pentagons.	244
M. L. Cartwright.	Presidential Address, 1952. Non-linear vibrations: a chapter in mathematical history.	81
V. G. Cavallaro.	Stereometry.	273
F. T. Chaffer.	Sign convention for bending moment and shearing force.	89
J. C. Cooke.	Where does the car engine stop?	180
J. L. B. Cooper.	Heaviside and the operational calculus.	5
N. Altshiller Court.	Isogonal conjugate points for a triangle.	167
H. M. Cundy.	25-point geometry.	158
	"Deltahedra."	263
M. P. Drazin.	A note on permutable bilinear transformations.	30
	A result concerning sequences of integers.	251
	A note on skew-symmetric matrices.	253
C. E. Easthope.	The existence of a spin integral in the motion of a rigid body in rolling contact with a rough surface.	20
T. J. Fletcher.	The solution of inferential problems by Boole algebra.	183
R. L. Goodstein.	On the limit of the ratio of sin x to x.	189
G. H. Jowett.	A simply constructed adding machine.	267
M. J. Kearsley.	Curves of constant diameter.	176

A 08219

Author.	Title.	Page
D. F. Lawden.	On the solution of linear difference equations.	193
B. E. Lawrence.	The conic and the auxiliary circle.	171
H. V. Lowry.	Polygons inscribed in polygons.	256
J. C. P. Miller.	The sum of the integral parts in an arithmetical progression.	234
R. E. Peierls.	An enquiry about entry to mathematics courses.	33
A. W. Siddons.	The first twenty years of the Teaching Committee.	153
G. C. Steward.	Plane kinematics.	111
A. Talbot.	Equimomental systems.	95
	The roots of certain determinantal equations.	270
Discussion on the Calculus Report.		197
K. S. Snell (p. 197); I. W. Busbridge (p. 201); summary of discussion (p. 204).		
Annual Meeting, 1952.		1
Report of the Council for 1951.		2

MATHEMATICAL NOTES.

Author	No.	Title.	Page.
H. ApSimon.	2312	All modern conveniences.	287
B. J. Banner.	2297	Approximate construction of the regular heptagon.	276
T. F. Battersby.	2259	The use of felt for the manufacture of visual aids.	37
B. C. Brookes.	2267	On the decimal for π.	47
A. Buckley.	2291	Note on reversed numbers.	137
	2311	The complex form of the inverse sine.	287
J. H. Clarke.	2298	A digital puzzle.	276
R. H. Collins.	2258	A visual aid technique for area formulae.	36
G. A. Dirac.	2271	On a property of circles.	53
C. V. Durell and A. Robson.	2283	On Note 2181.	126
C. F. Fisher.	2296	The prime line and a generalisation to n dimensions.	210
N. M. Gibbins.	2295	Evaluation of π.	209
H. J. Godwin.	2308	On Note 2180: Spearman's rank-correlation coefficient.	285
R. L. Goodstein.	2284	Some criteria for the infinite oscillation of alternating series.	126
C. B. Gordon.	2313	Etymology of sine.	288
S. L. Green.	2314	On Note 2281.	288
H. N. Haskell.	2274	The Simson line and its envelope.	56
N. D. Hayes.	2280	Contact of a quadric and a ruled surface.	124
S. G. Horsley.	2307	On sub-factorial n.	285
V. Inglada.	2273	Two applications of the product of rotations.	55
E. de St. Q. Isaacson.	2285	A note on multiple exponentials.	127
R. C. Lyness.	2270	The Cartesian oval.	51
	2289	Quartics with values which are perfect squares.	133
A. F. Mackenzie.	2309	On Note 2117.	286
E. A. Maxwell.	2263	Vanishing points.	43
A. J. Moakes.	2269	A physical problem and a recurrence formula.	49

Author.	No.	Title.	Page.
B. H. Neumann.	2276	On some interesting sets of circles.	121
F. H. Northover.	2303	The ejection of a cork from a bottle.	280
	2304	Newton's approximation.	282
A. Oppenheim.	2279	Note on alternating series.	123
	2310	The determination of an analytic function of z from a knowledge of its real part without differentiation or integration.	286
J. C. O'Reilly.	2277	Construction of a quadrilateral.	122
J. Pedoe.	2302	The constant-coefficient linear equation: equal roots.	279
H. T. H. Piaggio.	2294	The quotient of two quadratic functions.	208
B. D. Price.	2286	On the condition that the general equation of the second degree should represent a pair of straight lines.	128
	2287	Completely factorisable quadratics.	129
E. J. F. Primrose.	2288	Determination of the real foci of a central conic.	131
L. E. Prior.	2300	A note on conics having three points common.	277
D. A. Quadling.	2281	The kinetic energy of a rigid body.	125
	2282	The lens formula.	125
A. Robson.		*See* C. V. Durell.	
R. V. H. Roseveare.	2264	On a school certificate question.	44
	2265	Homographic chains.	44
M. Rumney.	2305	The cube of a polynomial as a determinant of order 3.	283
	2306	Steggall's proof of an identity.	284
A. K. Saroja.	2268	On expressing a number as the sum of distinct aliquot parts of another number.	48
J. Satterly.	2301	Simple dynamics and the value of g.	279
H. Simpson.	2292	On a type of plane algebraic curve of degree n with a multiple point of order $(n-1)$.	205
	2293	On a special type of plane trinodal quartic curve.	207
N. H. Smith.	2266	Geometry of many dimensions.	46
R. C. T. Smith.	2290	A remark on torsion.	135
G. D. C. Stokes.	2260	Three geometrical mechanisms.	38
B. A. Swinden.	2299	On Notes 2023 and 2094.	277
H. Todd.	2275	Chains of circles.	121
C. O. Tuckey.	2261	On Note 2117.	41
S. Vajda.	2262	On Note 2117.	42
R. Walker.	2278	The envelope equation of the circular points.	122
A. M. Weston and E. V. Whitfield.			
	2272	Robin's theorem on impulses.	54
E. V. Whitfield.		*See* A. M. Weston.	

REVIEWS AND NOTICES.

AUTHOR.	TITLE.	REVIEWER.	PAGE.
H. D. Aten.	*See* M. F. Rosskopf.		
S. Banach.	Mechanics.	*J. Williams.*	150
